Elliott Introduces L50 – 50 Foot HiReach Telescopic Material Handling Aerial Device

Omaha, NE – Elliott Equipment Company is pleased to introduce the L50 HiReach material handling aerial device. The L50 features a 50-foot working height and class leading 40-foot working side reach, making it ideal for a wide range aerial construction and maintenance activities. The L50 also features 2,000 lb. main boom material handling capacity, making it capable of lifting and moving heavy loads.

In addition to its powerful performance, the L50 HiReach is engineered for ease of operation and service. Users of the L50 will appreciate its sizeable 40" x 60" work platform with a 600-pound capacity with 160 degrees of rotation. Available platform productivity tools include a 500-pound capacity material handling jib, 'Office in the Sky' tools including 110V, welding, cutting, hydraulic, air and pressure washing circuits, and external material handling forks.

The L50 HiReach features several innovative features including:

- Optional One-touch outrigger set up, boom deploy and stow
- Bluetooth remote diagnostics and control adjustments
- Outriggers deploy within mirrors of chassis, allowing for work in confined areas
- 20% fewer hydraulic fittings than outgoing model
- High strength, lightweight steel for deflection-free boom operation and improved fuel efficiency

According to Elliott's Executive Vice President, John Glazer, "the L50 HiReach is one of the most advanced material handling aerial work platforms on the market today." He added, "the L50 has features like Bluetooth diagnostics, auto outrigger and boom deploy and stow that are not typically found in this height class. These add a great deal of value for the user in terms of time savings, serviceability, and peace of mind."

Key features of the L50 HiReach material handling aerial work platform:

- 50' working height
- 40' working side reach
- 2,000 lb. main boom material handling capacity
- 40" x 60" work platform with 600 lb. capacity
- 160 degrees of platform rotation allowing greater access per set up
- 500 lb. capacity material handling jib in platform
- Office in the Sky platform tools like welding, cutting and washing lines
- Platform material handling forks
- One-touch outrigger set up, boom deploy, and stow
- Bluetooth remote diagnostics and control adjustments
- Outriggers deploy within mirrors of chassis, allowing for work in confined areas
- 20% fewer hydraulic fittings than outgoing model
- Weighs 1,500 lbs. less than outgoing model for improved fuel efficiency
- Backed by lifetime structural warranty
- ANSI A92.2 compliant in all modes of operation

About Elliott Equipment Company

Elliott Equipment Company is a leading manufacturer of aerial work platforms, digging, and material handling equipment. We have been serving the utility, governmental, sign & lighting, energy, and transportation industries for over 75 years. We are committed to providing our customers with the highest quality products and services, and we are proud to offer a wide range of customizable solutions to meet their specific needs.
