WHEN EVERY HOUR MATTERS, ELLIOTT KEEPS YOU UP AND RUNNING

Elliott machines are built to maximize uptime, with service-friendly designs and industry-best support:

- **Performance You Can Trust** – We prioritize developing precision-built products to deliver long-term reliability of our aerial platforms, cranes, and digger derricks.
- **Built in the USA** – Manufactured in our state-of-the-art facility with advanced engineering, streamlined production, and uncompromised quality.
- **Lower Total Cost of Ownership** – With rigorous design, fabrication, and production quality checks, our equipment has minimal first-year warranty claims.
- **Safety First** – Purpose-built to meet or exceed ANSI and OSHA standards, providing peace of mind for your crews.
- **We Listen** – We start by asking questions and listening to your needs, then deliver solution-based customizations to ensure the right fit for your operation.

TRUSTED BY THOSE WHO SERVE

Utilities and contractors across the country depend on Elliott for their toughest transmission and substation jobs. From extreme heights to heavy lifts, we tailor every machine to the way you work — so you can finish more jobs with less downtime.

This Elliott is smooth as silk—the controls are intuitive, the auger shift is instant, and the lift feels like a Cadillac. Built stronger than it needs to be, with outriggers that can level anywhere, it gives operators the confidence and performance they expect right out of the gate.

ELLIOTT EQUIPMENT: BUILT FOR UTILITY APPLICATIONS

Utility projects demand equipment that can handle the tallest structures, heaviest lifts, and toughest environments – all while keeping crews safe and productive. Elliott machines are engineered specifically for utility work, delivering:

- **Reach** – access tall lines and structures safely and efficiently
- **Power** – lift heavy materials, dig faster, and handle the hardest jobs
- **Reliability** – proven, heavy-duty designs backed by a lifetime structural warranty
- **Productivity** – fast setup, smooth controls, and operator-focused ergonomics

From transmission to distribution, Elliott keeps your crews working longer, safer, and smarter.

FEATURE

BENEFIT FOR TRANSMISSION & DISTRIBUTION WORK

Industry Leading Tip Heights and Reach

Access transmission lines, tall poles, and structures safely and efficiently

Heavy Lifting Power

Handle poles, transformers and heavy materials with ease

EZ Crib Outriggers

Faster setup and reduced cribbing in challenging terrain or over guardrails

Insulated, Purpose-Built Designs

Meet stringent ANSI/OSHA standards while protecting crews on energized lines

Integrated Material Handling & Tool Circuits

Operate hydraulic, air, or electric tools from the platform, improving productivity

Wide Digging Radii & High Digging Torque

Maximize efficiency when setting poles and foundations

Precision Controls & Ergonomic Design

Improve operator comfort and reduce fatigue on long shifts

Durable, Heavy Duty Construction Backed by a Lifetime Structural Warranty

Long service life and reduced downtime for critical utility operations

I60F	65'	52'	3,650lb	33,000lb
H110F	117'	84'	14,000lb	58,000lb
L140	140'	80'	14,000lb	60,000lb

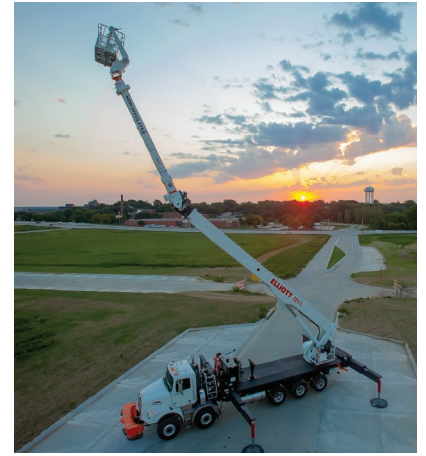

I50 HiReach

Reach Further. Work Safer. Finish Faster.

E-LINE AERIAL FEATURES

- Up to 240 ft working heights for maximum access to transmission towers
- Self-leveling, rotating material handler saves time and improves safety at height
- EZ Crib outriggers reduce cribbing and speed setup, even on tough terrain
- No trial lifts or proof tests required — fully ANSI A92.2 compliant in every mode of operation

Power in the Ground. Engineered to Lift More

DIGGER DERRICK FEATURES

- Tip heights from 86–115 ft for distribution and transmission applications leading tip heights from 86–115 feet
- High Pinpoint Boom Geometry delivers maximum lift power “out of the hole”
- Wide digging radii and high torque mean fewer setups and faster drilling
- Best-in-class lifting capacity ensures confidence with heavy poles and materials

Big Lifts. Smooth Operation

BOOMTRUCK CRANE FEATURES

- Tip heights up to 207 ft with jibs for high transmission work
- Compact footprint makes it easy to work in tight spaces without losing capacity
- Rugged, low-friction boom design for smooth, chatter-free operation

The Office in the Sky

HIREACH AERIAL FEATURES

- Telescopic “Point & Shoot” design eliminates tailswing risk and reduces lane closures
- Large, high-capacity work platform provides ample space for crews and tools
- Integrated tool circuits (110V, air, hydraulic) keep crews productive at height
- Material handling on boom and platform with lifts up to 14,000 lbs
- Unmatched side reach maximizes work completed per setup

Since 1948, Elliott has built purpose-driven truck-mounted aerials, cranes, and digger derricks in America's heartland. Our reputation rests on one simple promise: reliability when it matters most.
